-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The indicated allowability of claims 23-25, 27, 28, 30 and 31 is withdrawn in view of the newly discovered reference(s) to Turley (US 4,892,543). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-25, 27, 28, 30, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Turley (US 4,892,543). Turley anticipates the claim language where the anterior portion as claimed is met by component (42) of Turley, the posterior portion as claimed is met by component (44) with viewing element (60) that is clearly larger. The posterior and anterior orientation is considered to be merely a statement of intended use such that the device is capable of being used in a different orientation; see Figure 2 and column 2, line 12 to column 4, line 9. The biasing element as claimed is arm (54). The dioptic power of most surfaces are less than 30 diopters and all surfaces are 30 diopters or less; see column 4, lines 30-38.

With regard to claim 24, Applicant is directed to column 4, lines 60-64.

With regard to claim 27, the surface (50) is a refractive surface because it is curved. It must be below 30 diopters because the lens provides a total of 30 diopters in the state shown in Figure 2 that is provided by surface (48).

With regard to claim 28, depending upon what direction the light goes through ring (64), a positive refractive power is provided due to the curved surfaces thereof.

Allowable Subject Matter

Claim 26 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-6, 8-11, and 20-21 are allowed over the prior art of record.

Conclusion

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
